General

The dates in the calendar have been categorised as science, technology, engineering, maths, sustainability or general events. They have been colour coded for convenience.

As part of the calendar, we have also included sustainability events that link to the science curriculum. These can be useful to allow children to link their substantive knowledge and apply it to real-world contexts. Information on events that take place over an entire month can also be found on the calendar.

Where possible, we have included clickable links throughout the calendar which will direct you to the organisers of each event. These provide more information about the event or campaign and provide access to their resources.

13	14	15
	International Day of Mathematics	
20	21 The Great Big School Clean	22 World Water Day

Every effort has been made to ensure the contents is correct at the time of publishing. White Rose Education is not affiliated to or does not endorse any of the organisations within this calendar. If you do spot an error or feel that we have missed an important event, please email support@whiterosemaths.com.
